RAF Consult Project Management System — MARS

Design System Documentation

Field	Value
name	raf-consult-project-management-system-mars
version	1.1.0
status	grounded in Figma PDF snapshot; motion, shadow and z-index still inferred
source file	RAF Consult Project Management System - MARS
snapshot	10 frames: 1 marketing site (1440 × 6280) and 9 app frames (1920 wide)
revised at	2026-11-06
owner	Design Systems
accessibility target	WCAG 2.2 AA

0. Source Status & How to Read This Document

Version 1.0.0 was reconstructed without any design data and used a Tailwind-style blue palette. **That palette does not appear in your Figma frames.** This version replaces it with values measured from the PDF snapshot.

How values were obtained

- **Colors:** sampled from vector fills and rendered pixels, so hex codes are exact as rendered.
- **Type sizes:** read from the text layer of each frame.
- **Geometry (sizes, radii, gaps):** measured from vector shapes on the 1920 px app frames (1 unit = 1 px).
- **Font families:** the PDF embeds glyph outlines without family names, so families were identified visually and must be verified.

Marker	Meaning
✓ Extracted	Measured directly from the Figma snapshot
◆ Inferred	Proposed to fill a gap the Figma file does not cover
! Verify	Identified visually or ambiguous; confirm in Figma

What changed from 1.0.0

- Primary color is now deep navy `#08086F`, not blue `#2563EB`. The canvas is pale blue-white `#F5F7FF`.
- Three type families are in use (sans, monospace, serif italic), not one.
- Cards use 24px radii and the sidebar is a floating navy rail; both were absent from 1.0.0.
- Components and screen patterns are documented from the actual frames.
- A new section (§6) lists inconsistencies found in the Figma file.
- Success, warning and neutral extended scales from 1.0.0 are **retired** unless re-confirmed (see §2.1).

1. Context and Goals

Product: RAF Consult Project Management System — MARS

Surfaces: secure client and staff portal (login, dashboard, projects, users and teams) plus a public marketing site.

Audience: project managers, site engineers, clients and administrators of a civil, structural and geotechnical consultancy.

Design intent: calm, institutional and engineering-grade. Deep navy on a pale canvas, monospace for data labels, and serif italic for editorial headlines.

Goals

1. One token set governs color, type, space, radius and motion.
2. Every interactive component defines default, hover, focus-visible, active, disabled, loading and error states (the Figma file currently shows only default and selected).
3. WCAG 2.2 AA is a release gate.
4. Engineers and agents produce the same UI from the same tokens.

Non-goals

- A full dark theme. The password-recovery modal uses a dark surface, which is documented as a component variant (§3.11), not a theme.

---

2. Design Tokens and Foundations

2.1 Color Tokens

Brand and surfaces (✓ Extracted)

Token	Hex	Where it appears
`color-brand-navy`	`#08086F`	Sidebar rail, primary buttons, avatar, active project pill, progress fill, login panel, marketing hero
`color-brand-navy-raised`	`#131375`	Raised tiles on navy (nav items, welcome tile)
`color-bg-canvas`	`#F5F7FF`	App page background, login right panel
`color-bg-surface`	`#FFFFFF`	Cards, panels, inputs, header
`color-bg-section-alt`	`#F0F3F8`	Alternating section background on the marketing site
`color-bg-footer`	`#101C36`	Dark band on the marketing site
`color-bg-dark-surface`	`#0D1630`	Password-recovery modal
`color-bg-dark-raised`	`#19213A`	Icon circle inside the dark modal
`color-action-blue`	`#2545E1`	Primary button on dark surfaces
`color-blue-900`	`#1E3A8A`	Icon glyphs and the modal icon-circle border

Neutrals, borders and text (✓ Extracted unless noted)

Token	Hex	Where it appears
`color-border-default`	`#B4BCDB`	Pill, card and input outlines (drawn as 1px lines)
`color-divider`	`#E8E8E8`	Header divider
`color-divider-soft`	`#DBDBDB`	Secondary dividers
`color-text-primary`	`#000000`	Headings and data on the dashboard ! pure black
`color-text-secondary`	`#334155`	AI summary text, form text
`color-text-muted`	`#5E687B`	Marketing secondary text
`color-text-placeholder`	`#94A3B8`	Form placeholders (fails contrast, see §7)
`color-text-on-navy`	`#FFFFFF`	Text on navy surfaces
`color-text-on-dark`	`#CED0D5`	Body text in the dark modal

Status and feedback

Token	Hex	Where it appears
`color-status-completed-bg`	#7FCBA7	Completed badge fill ✓
`color-status-completed-dot`	#009951	Completed badge dot ✓
`color-status-tender-bg`	#FCB3AD	Tender stage badge fill ✓
`color-status-tender-dot`	#C00F0C	Tender stage badge dot ✓
`color-danger`	#CA3E3C	Delete icon buttons ✓
`color-danger-subtle`	#FEF2F2	Restricted-data banner ✓
`color-danger-text`	#991B1B	Banner text ✓
`color-chart-done`	#0097B2	Timeline "Done" bars (sample data) ✓
`color-chart-progress`	#518CC8	Timeline "On Progress" bars (sample data) ✓
`color-warning`	#D97706	No warning color exists in Figma (notifications use an emoji) ◆

Off-system colors found in the Create Project form (! Verify)

Hex	Where it appears
#6366F1	Step number circles and the Create Project button (Tailwind indigo-500, not brand navy)
#F8FAFC, #E2E8F0, #334155, #94A3B8	Slate neutrals for dropzone, toggle, field text (Tailwind slate)
#38378B	Users & Teams avatar tiles and action buttons (a second, lighter navy)

Usage rules

- `color-brand-navy` is the only primary action color. Do not use a second brand hue.
- Status is always icon or dot plus text, never color alone.
- Use semantic tokens in component code, never raw hex.

2.2 Typography Tokens

Family token	Family	Used for
`font-sans`	Inter !	Page titles, buttons, card titles, body, forms
`font-mono`	IBM Plex Mono !	Brand tagline, nav labels, dashboard card titles and values, key-value metadata, status badges, AI summaries
`font-display`	Crimson-style serif, italic ! (Crimson Pro or Crimson Text)	Login headline, "Intelligence in Construction", modal title, "Welcome Back"

App type scale (✓ sizes extracted; roles read from the frames)

Size	Family and weight	Role
74px	Display, italic and bold	Login right-panel hero
48px	Display (login heading); Mono bold (dashboard stat values)	Hero heading, KPI value
36px	Display italic (modal title); Sans (dashboard "Your Overview")	Modal title, dashboard heading
32px	Sans, light	Page title in the header (Dashboard, Projects, Users & Teams)
28px	Mono bold	Panel titles (Project Health, Notifications)
24px	Mono bold (KPI labels); Sans semibold (project card titles, form title)	Card and section titles
23px	Sans semibold	Brand wordmark "Raf Consult"
20px	Sans semibold	User names, avatar initials
16px	Sans or mono, regular	Body, labels, search, nav labels, badges
14px	Sans or mono, regular	Secondary body, metadata, notification text, compact buttons
13px	Sans, medium	Form field labels
12px	Sans	Step numbers, helper text
11px	Sans	"Optional" pill
9px	Mono	Brand tagline

The marketing site uses a looser 19-step scale (9 to 74px). Treat the app scale above as canonical and consolidate the marketing scale to match (!).

Rules

- One display-size heading per screen.
- Display serif is for brand and editorial moments only, never for data or form labels.
- Monospace carries data (numbers, IDs, metadata); do not use it for paragraphs longer than two lines.
- Body text minimum is 14px; 9 to 12px is for supporting metadata only.
- Numbers use tabular figures.

2.3 Layout and Spacing (✓ measured on the 1920px frames)

Item	Value
App frame	1920px wide
Sidebar (collapsed)	72px wide, 10px inset from the frame edge, 24px radius
Sidebar item tile	42 × 44px, 10px radius, 54px pitch
Brand logo box	70 × 58px
Content left edge	137px; content width 1733px
Header	Page title (32px), search, bell, settings tool, 44 × 44px avatar
User card grid	3 columns, cards 571 × 202px, 10px horizontal gap, 30px vertical gap
Project card	1733 × 440px
Form container	1753px wide, 24px padding
Form field row	48px tall; two-column gap 17px; textarea 120px tall
Progress bar row	48px tall, 22px between rows

Observed gaps (10, 17, 22, 24, 30) are not on a consistent grid. Proposed snap to the scale below (◆):

Token	px
space-1	4
space-2	8
space-3	12
space-4	16
space-6	24
space-8	32
space-12	48

2.4 Radius Tokens (✓ measured)

Token	Value	Used on
radius-sm	8px	Inputs, buttons, form rows
radius-md	10px	Sidebar tiles, header avatar
radius-lg	16px	Form container
radius-xl	20px	User avatar tiles
radius-2xl	24px	Cards, sidebar rail, modal, progress bars
radius-full	9999px	Pills, badges

2.5 Elevation, Motion, Layering (◆ Inferred; not present as styles in Figma)

Token	Value	Use
shadow-card	0 4px 12px rgba(8,8,111,0.08)	User cards, panels (Figma shows a soft grey shadow !)
shadow-modal	0 24px 48px rgba(13,22,48,0.20)	Modal (Figma shows a large soft shadow !)
duration-fast	120ms	Hover and focus
duration-base	200ms	Dropdowns, toasts
duration-slow	320ms	Modal enter
ease-standard	cubic-bezier(0.2, 0, 0, 1)	Default easing
z-sticky / z-dropdown / z-modal / z-toast	10 / 20 / 50 / 60	Layering

Animate only opacity and transform, and honor prefers-reduced-motion.

2.6 Iconography (! Verify library)

Outline icons with rounded caps, about 2px stroke at 20 to 24px. They resemble Lucide or Feather: user, layout-grid, briefcase, clipboard, users, trending-up, bell, wrench, settings, search, filter, eye, check, edit, trash, upload-cloud, calendar, lock, plus. Emoji currently stand in for icons in notifications, the AI summary and the welcome tile; replace them (§6).

---

3. Component Specifications

3.1 App Shell

- **Sidebar, collapsed:** navy rail (color-brand-navy), icon tiles 42 × 44px. The active tile is white with a navy icon. Settings gear sits at the bottom.

- **Sidebar, expanded (315px):** logo and tagline, welcome tile (`color-brand-navy-raised`), nav items with icon and mono label (Dashboard, Projects, Tasks, Users & Teams, Reports). The active item is white with navy text.
- **Header:** white, bottom divider `#E8E8E8`. Left: page title (32px sans light). Right: search field, bell, settings tool, avatar.
- **Avatar:** 44 × 44px, navy, 10px radius, initials in white 20px.

3.2 Buttons

Variant	Background	Label	Size	Used for
Primary	`#08086F`	White, 14px	44 to 48px tall, 8px radius	New Project, Edit, New User, New Team
Primary on dark	`#2545E1`	White, 16px semibold	Full width, 8px radius	Continue (modal)
Light on navy	`#FFFFFF`	Black, 16px semibold	Full width, 8px radius	Log In
Secondary	White with outline	Dark	44px tall	Cancel
Icon, action	`#38378B` !	White icon	About 42px square	Copy, edit (user cards)
Icon, danger	`#CA3E3C`	White icon	About 42px square	Delete (user cards)

Rules

- One primary button per view region.
- The Create Project form currently uses indigo `#6366F1` for its primary button; change it to `color-brand-navy` (§6).
- Destructive actions need confirmation or an undo.

3.3 Inputs

- Height 48px (login 44 to 46px), radius 8px, white background, 1px outline.
- Labels 13px above the control; placeholder in `color-text-placeholder`.
- Search field: magnifier icon at the right. Filter field: funnel icon at the right.
- Select: chevron at the right. Date: calendar icon at the right. Password: eye toggle.
- **Missing in Figma (◆ required):** hover, focus-visible (2px navy ring, 2px offset), error, disabled, readonly.

3.4 Project Selector Pills

- Pill with 1px `color-border-default`, 16px label. Active pill is filled navy with white text. Used to switch project context on the dashboard.

3.5 Cards

- **Stat card:** white, 24px radius, mono bold title (24px) and right-aligned value (48px).
- **Panel:** same surface with a 28px mono bold title (Project Health, Notifications).
- **Project card:** 24px radius; 24px title, status badge, Edit button, key-value metadata in mono 14px, AI summary callout, hero image.
- **User card:** 571 × 202px, 100px avatar tile (`#38378B`, 20px radius), name 20px, mono-style metadata 14px, three stacked action buttons.

3.6 Status Badge

- Pill, dot plus mono label. Completed: fill `#7FCBA7`, dot `#009951`. Tender stage: fill `#FCB3AD`, dot `#C00F0C`.
- The label is currently white on a pastel fill, which fails contrast (§7). Use the dark label tokens in §7.

3.7 Progress Bar

- Track 900px wide, 48px tall, pill-shaped, navy 1px outline, canvas fill. Fill is `#08086F`. Percentage sits to the right in mono.

3.8 Timeline (Gantt)

- Rows with task labels at left and rounded bars on a pale track. Done `#0097B2`, On Progress `#518CC8`. The frame currently carries a **SAMPLE** watermark; the real data model is undefined (!).

3.9 AI Summary Callout

- Bordered box with a robot glyph and mono text in `#334155`. Solid outline on list cards, dashed outline on the detail view. Pick one variant.

3.10 Notifications Panel

- Stack of bordered cards with a bold title, a "Project:" line and bullet details, including "AI Insight" and "AI Suggestion" lines.
- Severity is currently an emoji (□ ⚠ □ ✓ □). Replace with an icon plus label, and use a real severity color for each level.

3.11 Confirmation Modal (dark variant)

- 552 × 552px, `#0D1630`, 24px radius, large soft shadow.
- 70px icon circle (`#19213A`, 1px `#1E3A8A`) with a check glyph, serif italic title at 36px, 16px body in `#CED0D5`, full-width `#2545E1` button.
- Standard modal rules apply: focus trap, `Escape` closes, `role="dialog"`, focus returns to the trigger.

3.12 Forms (Create Project)

- White container, 16px radius, 24px padding, six numbered sections separated by 1px dividers.
- Section header: numbered circle plus 16px title. Fields are two-column on desktop, full width for description, status and location.
- "Optional" pill (11px) on non-required fields. Restricted-data banner uses `#FEF2F2` with `#991B1B` text and a lock icon.
- Dropzone: dashed outline, upload icon, "PNG, JPG up to 5MB". Toggle for "Publish project".
- Action bar: Cancel (secondary) and Create Project (primary), right-aligned, with helper text at left.

3.13 Image Gallery (Project Detail)

- One large image beside three stacked thumbnails, 8px gaps, rounded corners, left of the metadata and AI summary.

---

4. Screen Inventory

Frame	Size	Purpose
Marketing site	1440 × 6280	Public landing page: hero, expertise, sectors, approach, FAQ, enquiry form, footer
Login	1920 × 1080	Split layout: navy form panel (660px) and canvas hero panel
Password recovery sent	552 × 552	Dark confirmation modal
Dashboard	1920 × 1080	KPI cards, project health bars, notifications
Sidebar (expanded)	315 × 1068	Expanded navigation
Project dashboard	1920 × 1080	KPI cards, timeline, notifications
Projects list	1920 × 1188	Search, filter, project cards
Project detail	1920 × 1080	Gallery, metadata, AI summary
Create Project	1920 × 1991	Six-section form
Users & Teams	1920 × 1080	User card grid

The marketing site reuses `#08086F` for its hero and uses numbered mono eyebrows (for example "01 / RAF CONSULT"), alternating `#F0F3F8` sections, and a `#101C36` dark band.

5. States, Content and Tone

Required states (◆): default, hover, focus-visible, active, disabled, loading, error, selected. Figma currently designs only default and selected (active nav tile, active pill).

Voice: the brand is confident and editorial ("Track Intelligently Now.", "Intelligence in Construction"). App UI is plain, sentence case and verb-first.

Rule	Standard
Currency	`RM 58,900.99` and `RM 60M` (with a space; Figma mixes `RM58,900.99` and `RM 25 million`)
Dates	`DD MMM YYYY`, with the timezone on timestamps
Empty states	Always offer the next action
Errors	What happened plus how to fix it
Search placeholder	"Search…" (Figma shows four dots)

6. Inconsistencies and Remediation (found in the Figma file)

#	Finding	Recommendation
1	Create Project uses indigo `#6366F1` and slate neutrals instead of navy and the brand borders	Re-skin the form with `color-brand-navy`, `color-border-default` and brand text tokens
2	Three navies in use: `#08086F`, `#38378B` (Users page), `#1E3A8A`	Keep `#08086F` as primary; define `#38378B` and `#1E3A8A` as named secondary tokens or remove
3	Status badges use white text on pastel fills (1.9:1 and 1.7:1)	Use a dark label (§7) or darken the fill
4	Placeholder `#94A3B8` on white is 2.56:1	Darken to at least `#6B7280`
5	Gaps of 10, 17, 22, 24, 30px are off-grid	Snap to the spacing scale in §2.3
6	Form labels at 13px and pills at 11px sit outside the main scale	Move to 14px and 12px
7	No hover, focus, disabled, error, loading or empty states	Design them for each component
8	Emoji used as icons (notifications, AI summary, welcome)	Replace with the icon set; emoji render differently per platform
9	Password recovery says a "new password has been sent" by email	Send a time-limited reset link instead of a password
10	Placeholder content: SAMPLE watermark, same photo on two projects, "Completed 2017" on a tender-stage project, empty "Total Budget"	Replace with real or clearly marked sample data
11	No warning, success or info semantic colors exist	Define them (◆ proposals in §2.1)
12	No Figma styles or variables, so tokens cannot be extracted automatically	Create local styles and variables (§9)

7. Accessibility (WCAG 2.2 AA), recomputed with measured colors

Pair	Ratio	Verdict
White on `#08086F`	16.5:1	✓ AAA
`#08086F` on `#F5F7FF`	15.4:1	✓ AAA
`#000000` on `#F5F7FF`	19.6:1	✓ AAA
`#334155` on white	10.4:1	✓ AAA
`#5E687B` on white	5.6:1	✓ AA
White on `#2545E1`	7.0:1	✓ AAA
White on `#CA3E3C`	4.9:1	✓ AA
`#CED0D5` on `#0D1630`	11.6:1	✓ AAA
`#991B1B` on `#FEF2F2`	7.6:1	✓ AAA
White on `#6366F1`	4.5:1	⚠ Borderline; passes only by rounding (4.47)
`#94A3B8` on white (placeholder)	2.6:1	✗ Fails AA
White on `#7FCBA7` (Completed badge)	1.9:1	✗ Fails AA
White on `#FCB3AD` (Tender badge)	1.7:1	✗ Fails AA
`#B4BCDB` border on `#F5F7FF`	1.8:1	✗ Fails 3:1 for input boundaries; darken input borders

Requirements

- Visible focus ring on every focusable element: 2px navy outline, 2px offset (◆).
- Targets: 44 × 44px for primary controls, 24px absolute minimum. Sidebar tiles (42 × 44px) are close; make them 44px wide.
- Status is conveyed by icon or dot plus text, never color alone.
- Inputs need programmatic labels, `aria-invalid` and linked error text.
- Respect `prefers-reduced-motion`; usable at 200% zoom and 320px width.
- Progress bars expose a text value and `role="progressbar"`.

---

8. Implementation Guidance for Agents

1. Read this file before writing UI.
2. Map every value to a token in §2. If none fits, stop and ask.
3. Use `color-brand-navy` for primary actions and the sidebar. Do not use indigo, Tailwind blue or the v1.0.0 palette.
4. Use sans for UI, mono for data labels and display serif only for brand headlines.
5. Implement all states in §5, including those Figma has not designed.
6. Prefer the components in §3; do not invent new families.
7. If Figma and this document disagree, flag it rather than choosing silently.

Suggested prompt line:

> *"Before any UI work, read DESIGN.md. Use only the tokens defined there. Navy* `#08086F` *is the sole primary color. Flag any value marked ! Verify if it blocks the task."*

QA checklist

- ■ No raw hex outside token definitions.
- ■ Spacing, radius and type come from the scales.
- ■ All states implemented, with a visible focus ring.
- ■ Contrast passes (§7), including badges and placeholders.
- ■ Layout works at 320, 768, 1024 and 1920px.
- ■ Reduced-motion respected.

---

9. Figma Remediation Plan

1. Create color styles or variables for every token in §2.1 with the same names.
2. Create text styles for the §2.2 scale with the three family tokens.
3. Create a variable collection for spacing, radius and duration.
4. Create effect styles for `shadow-card` and `shadow-modal`.
5. Convert repeated elements to component sets with variants for state: buttons, inputs, pills, badges, cards, nav items, modal.
6. Fix the §6 items, then publish the library and re-run the extraction to confirm values.

---

10. Open Questions (! Verify in Figma)

1. Confirm font families: Inter, IBM Plex Mono and the serif (Crimson Pro or Crimson Text), and their weights.
2. Is `#38378B` an intended secondary navy, or a drift from `#08086F`?
3. Is `#000000` the intended text color, or do styles use a near-black?
4. Exact shadow values for cards and the modal.
5. Border colors for inputs on the standard (non-form) screens.
6. Warning, success and info colors for notifications.

7. Icon library and stroke weight.
8. Should the Create Project form be re-skinned to navy, or is indigo intentional?
9. Responsive behavior: only desktop frames exist (1920px and 1440px).
10. Dark mode scope, given the dark modal variant.

---

11. Change Log

Version	Date	Change
1.1.0	2026-11-06	Rebuilt from the Figma PDF snapshot: replaced the inferred Tailwind palette with measured navy-based colors; added three-family typography, measured layout and radii, component and screen documentation, an inconsistencies register and recomputed contrast.
1.0.0	2026-11-06	Reconstructed documentation from SKILL.md with inferred values. Superseded.
